VOLUNTARY ANNOUNCEMENT

Chinasoft and HarmonyOS Ecological Services Company Signed a Cooperation Agreement to Jointly Create a Flourishing Era for the HarmonyOS Ecosystem

Chinasoft International Limited (hereinafter referred to as “**Chinasoft**” or “**the Company**”) releases this announcement as a voluntary announcement to let the public know the latest information of the Company.

The Company is pleased to announce that recently it has signed a service cooperation agreement with HarmonyOS Ecological Services (Shenzhen) Co., Ltd. (hereinafter referred to as “HarmonyOS Ecological Services Company”). Chinasoft and HarmonyOS Ecological Services Company are collaborating to leverage their respective strengths, resources, and technical capabilities to explore the development paths of the HarmonyOS ecosystem in various industry sectors. Together, they are devoted to charting the course for a flourishing era in the HarmonyOS ecosystem.

With this signing, Chinasoft and HarmonyOS Ecological Services Company will strongly collaborate, focusing on operating system technological innovation, ecological prosperity, and application implementation to provide a solid foundation for industry informatization and the construction of the digital economy. The two parties will closely collaborate on business opportunities matchmaking, technical consultations, talent development, policy guidance, technical certification, market promotion, and other aspects, centering around Chinasoft’s use of the open-source Harmony as the ecological foundation. Drawing upon their expertise, they will build industry-specific solutions and a comprehensive technical prowess, including self-developed intelligent products such as the Leize Connect all-in-one machine, Yiwang Connect Companion, and Display terminal series. Coupled with HarmonyOS Ecological Services Company’s robust resource integration and industry-driving capabilities, the two companies aim to jointly propel comprehensive cooperation in the HarmonyOS ecosystem across all scenarios. This involves constructing a HarmonyOS-oriented ecosystem, fostering mutual prosperity, creating value, and achieving a win-win collaboration.

Recently, units including the Chinese Academy of Engineering released the ‘2023 Global Top Ten Engineering Achievements’, with HarmonyOS making the list. This marks a new round of technological innovation into the era of all-scenario technology. The Shenzhen Municipal Department of Industry and Information Technology also issued the ‘Shenzhen open-source Harmony Euler Industry Innovation Development Action Plan (2023-2025)’, providing comprehensive support for the development of the open-source Harmony industry ecosystem. This initiative is expected to bring new opportunities for industrial innovation for Chinasoft and HarmonyOS Ecological Services Company. Both parties are committed to actively responding to national strategic science and technology development policies. They will collaboratively explore the practical applications of the open-source Harmony across various industries, leading the way in the all-scenario intelligent era of the HarmonyOS ecosystem.

Looking ahead, Chinasoft will collaborate with HarmonyOS Ecological Services Company to actively participate in the construction of the HarmonyOS ecosystem. Focused on the integration of ‘perception, connectivity, intelligence, and control’, and leveraging the core technological capabilities of open-source Harmony, the collaboration aims to continuously release self-developed intelligent products and all-scenario solutions. This initiative will target industries such as water conservancy, education, transportation, and urban lifelines, etc. Together with more ecological partners, the goal is to support open-source Harmony in achieving technological breakthroughs, industrial advancements, and ecological development, ultimately creating a more beautiful, open, and convenient digital future.

About HarmonyOS Ecological Services (Shenzhen) Co., Ltd.:

HarmonyOS Ecological Services Company envisions “accelerating the thriving development of the HarmonyOS ecosystem and building a digital foundation for various industries”. It serves as the construction and operational unit for the HarmonyOS Ecological Innovation Center, providing services such as policy dissemination, subsidy application assistance, business opportunity matchmaking, technical support, brand promotion, talent development, and testing certification to HarmonyOS ecological partners. Together with the partners, the company is committed to jointly promoting the development and prosperity of the HarmonyOS ecosystem industry, as well as collaboratively building the next generation of the root community for intelligent terminal operating systems.
